

LX300 Issue 3
Xenon 150 w
Manual Control

APPLICATION

THE HIGH PERFORMANCE FRANCIS LX range of searchlights incorporate the design features required to successfully operate searchlights in the most demanding product operating environments on land and sea.

Within the Francis Lite range of marine searchlights, the LX300, utilising a 150w xenon lamp, has been designed to give maximum beam range and candlepower, which DC incandescent halogen lamps are unable to achieve. Having the ability to identify objects and potential dangers from a far greater distance, the LX300 can prevent both vessel and lives being put to risk. As an optional extra, this unit is also available with infra-red night vision ensuring total covert surveillance
