

LX480RC Issue 5
Xenon 2KW Remote
Control, Variable Speed

APPLICATION

The new FRANCIS LX Premium range of variable speed Remote Controlled Searchlights incorporate the design features required to successfully operate searchlights in the most demanding product operating environments on land and sea.

Francis Searchlights have developed and improved all remote controlled searchlight across the range still further by adding full variable speed, a new modern and sleek joystick control panel, using membrane and LED technology, offering RS485 interface and an auto home position setting, all at no extra cost.

The Xenon offers a colour temperature similar to daylight, and offers exceptional illumination, especially in polar regions and long range navigation.
